

Mentor Guide

How to sign in, share your booking link, and log sessions on freshlog.

1 Signing in

1. Open freshlog and click "Continue with Google".
2. Sign in with your @freshman.academy account. Enter your full name if asked.

TIP If your account is brand new you'll see "not yet assigned to a program." An admin needs to assign you before students and session logging appear — check back shortly after.

2 Set your booking link

1. On "My students", find the "Your booking links" panel.
2. Paste your calendar link (e.g. Calendly, starting with https://) for each program you're assigned to, and save.
3. Students in that program can now book you. Until you add a link they see "no booking link yet."

3 Log a completed session

1. Use the "Log a completed session" form on "My students" (or on a student's page).
 2. Pick the student. Naming the task it went toward is optional — the list holds the tasks an admin allocated your hours for — but a meeting that fits none of them is still worth logging.
 3. Enter the hours and the date, and a note on what you covered.
 4. Say how it went: Attended, Came late, Absent, or Rescheduled.
 5. Click "Log session".
- Attended — the ordinary case. The hours are charged.
 - Came late — it happened; log the hours you actually spent.
 - Absent — a no-show. The hours are still charged, but tracked separately as "missed" so everyone can see it.
 - Rescheduled — the meeting moved, so no hours are charged. It stays in the log as a record.

TIP Empty task list? No hours have been allocated to you for that student yet. Ask an admin — hours and the task they are for arrive together.

4 Deadlines

Each student's hours with you have a use-by date, shown in the "Use by" column and marked red once passed.

TIP After the deadline those hours expire — you can't log new sessions against them. Ask an admin to extend the deadline or allocate fresh hours.

5 Fix or void a session

Click "Correct" on any session you logged — on the "Sessions" page, or on the student's own meetings log — to change the task it counted toward, its hours, date, notes, or how it went. Voiding it there returns the hours to the student and keeps the row as history. The student is notified of every change.

6 If a session has no task

Log it anyway. An admin can attach it to a task later, and so can you with "Correct" once the task exists.

7 Feedback & notifications

"My feedback" shows the ratings students left you. The bell icon (top-right) collects your updates.
